# Introduction

Cubipay Token (CIP) is a utility-driven digital asset built on the Binance Smart Chain (BEP-20) network, aiming to integrate blockchain technology into various sectors such as online gaming, AI, and NFTs. With 50% of its total supply dedicated to community initiatives, Cubipay emphasizes community empowerment and plans to implement a governance model that allows token holders to participate in decision-making. The project focuses on providing secure, efficient, and versatile payment solutions, particularly for cross-border transactions and micro-payments. By leveraging technologies like AI and engaging with the metaverse, Cubipay seeks to offer intelligent platforms and facilitate seamless transactions within virtual spaces. Its strategic roadmap includes phased rollouts, security audits, and community engagement through events and educational initiatives. By concentrating on practical applications, Cubipay aims to create a sustainable ecosystem that offers real-world value to its users.

# Our Purpose

At Cubipay, we are dedicated to revolutionizing the way people and businesses interact with blockchain technology.

## Mission

Empowering businesses and individuals with seamless blockchain solutions, we connect digital assets to real-world applications. With Move to Earn, AI, and NFT platforms, we promote inclusion, growth, and adoption in gaming, real estate, and the metaverse.

## Vision

Cubipay Token (CIP) aims to lead as a utility token, driving innovation in AI, blockchain, and digital ownership. With a focus on transparency, security, and decentralization, CIP bridges blockchain with traditional industries, enabling seamless transactions and digital asset management. Supporting a global community, it powers the metaverse economy and fosters growth across emerging technologies.

# Tokenomics

Token Name	CUBIPAY
Symbol	CIP
Total Supply	76 CR
Network	BEP - 20
Decimal	18

The total supply of CIP Tokens is capped at 76 Crores.  
Outlined below is the planned allocation and distribution strategy for CIP Tokens.

# Roadmap

## Foundation & Development

- Whitepaper creation, BEP-20 smart contract deployment.
- Onboarding advisors, building a community via marketing.

Phase 1

## Growth & Adoption

- CEX listings, M2E platform launch.
- RWA tokenization, staking, and reward programs.

Phase 3

Phase 4

## Global Expansion & Governance

- Blockchain for real-world use cases, strategic partnerships.
- Global marketing, community governance initiatives

Phase 2

## Initial Launch & Expansion

- Token launch on DEXs, beta testing online gaming.
- M2E prototype development, NFT marketplace setup.

## Advanced Ecosystem Deployment

- Full NFT marketplace, AI integration.
- Metaverse demos, security audits, and compliance.

Phase 5
